My name is Alan and I am an actively employed web programmer and developer currently living in Burlington, Vermont. At this time I am looking for a solid opportunity to join a team of intelligent professionals in the Boston, Mass area where my wife and I hope to soon relocate. You are looking for a well balanced Web Programmer with a proven skill set, so I encourage you to read on.

I am currently employed at 800response Marketing LLC where I have been since I graduated in May of 2007 from St. Lawrence University with a BS in Computer Science. My position as a PHP Web Programmer has grown my technical skills in ways I could not have imagined when I completed my studies at St. Lawrence. I attribute my growth as a professional to working in an intelligently planned environment that fosters critical thinking, constant problem solving, and self analysis.

At 800response I have served as one of four programmers adding to and maintaining our flagship products, 800tracking.com and findmycalls.com. In the development of these applications we used current web standards, an in-house MVC framework, and object-oriented programming to give our applications the most efficient development time possible. These applications receive 5,000+ daily site hits and have industry standard up-time.

I take pride in my methodology when approaching a problem, complex or otherwise, always with a cool head and a systematic approach that results in one of my favorite paradigms: simple solutions for complex problems. Taking such pride is necessary when working with one of the largest parts of my life, the world wide web. When I was 12 and finally received an internet-capable computer, one of the first things I researched was creating my own website. I have been learning and growing with the web ever since.

I have much more to say. I've set up a website with code samples and more about myself. It is part of my music web store where you can also look into one of my other great passions: <http://www.alanmarcero.com/portfolio>. You may contact me at alanmarcero@gmail.com at your earliest convenience.
